

CORPORATE PARTNER WORKSHEET

Bryan Health HeartAware
Bryan Medical Center
1600 S. 48th Street
Lincoln, NE 68501

Description of Services Provided:

HeartAware provides a quick and easy online test that helps determine if a person is at risk for heart disease. Unlike many medical conditions, heart disease can largely be predicted and prevented.

Bryan offers the HeartAware program, free of charge, to Heartland Health Alliance members. This collaborative program provides easy access for patients at risk to seek consultation with a designated HeartAware consultant (locally) and helps them connect with their primary physician. This program facilitates relationships between patient, physician and hospital.

Bryan has a dedicated coordinator to assist with implementation and ongoing support for Heartland Health Alliance members.
