

Thank you taking the time to review the information on our company, Sadoff E-Recycling & Data Destruction. Our parent company, Sadoff Iron & Metal is a 3rd generation, family-owned business that has been leading the metals recycling industry since 1947. Sadoff has been purchasing electronics scrap for over 20 years and within the last 3 years created a dedicated business unit, Sadoff E-Recycling & Data Destruction, in response to the growing need for certified, secure, responsible and sustainable business to business recycling of electronics. Sadoff has a total of nine facilities throughout the Midwest to service the needs of our clients. Sadoff operates with the following internationally recognized certifications:

- ISO 9001:2015 – Quality
- ISO 14001 – Environmental
- OHSAS 18001 – Health and Safety
- R2 – Responsible Recycling for Electronics Recyclers

Secure Recyclers has successfully served The Bryan Health Organization for secure electronics recycling and services for the past 10 years. In 2017 Secure Recyclers was acquired by Sadoff E-Recycling & Data Destruction, and today Sadoff continues to partner with the Bryan Health organization to achieve value and ensure the secure and environmentally responsible disposal of electronic equipment.

Secure removal of the commodities and metals from electronic devices ensures full life-cycle recycling, protects your brand, image and further enables us to create value for End-of-Life & Surplus Electronic equipment. By working with Sadoff E-Recycling & Data Destruction, your material becomes part of a much grander picture, promoting sustainability and is something you can feel good about.

Sadoff has a fresh approach to electronics recycling, we look at everything as having value for the recovered metal commodities. Sadoff does not resell complete units or any items that may have ever or currently contain data. Sadoff values our client's security and privacy and in honoring this value all data-bearing devices are shredded at our secure facility. Having a parent company with a strong metals recovery and recycling background enables us to generate value for material where others cannot.

Our customer portal allows our clients secure online access to view all the details of their account and transactions allowing the tracking for loads, payments, and the ability to self-generate reports from your recycling activities.

Attached find a current price list. If you have something that is not on the list and need additional pricing just let me know.

Please feel free to contact me with any questions or to schedule a tour of our secure facility to see our processes first-hand.

Sincerely,

Matt Weirman
