

BRYAN ATRIAL FIBRILLATION CENTER OF EXCELLENCE (BrACE) CLINIC

Atrial fibrillation, AFib, affects 2.7 million Americans, and is the most common heart rhythm disorder. Left untreated, it can lead to blood clots, stroke and heart failure.

Afib/Aflutter Symptoms:

- Irregular, rapid heartbeat
- Heart palpitations or fluttering in the chest
- Shortness of breath
- Weakness, feeling dizzy or faint
- Fatigue, being very tired

* While most people experience some symptoms, it is possible to have Afib/Aflutter without any of the above symptoms.

You can take comfort knowing your patients are in the care of experienced and compassionate doctors and nurses who are leaders in the field of treating AFib/AFlutter. Our doctors and nurses at the Bryan Atrial Fibrillation Center of Excellence (BrACE) provide the personalized care, attention and expertise your patients need to treat and manage their condition.

Your patients can expect:

- Consultation with board certified Electrophysiologist and Nurse Practitioner
- Review of results and development of a personalized treatment plan
- Convenient, routine follow-up appointments
- Nurses and staff are available anytime for questions or concerns about their heart health or how they're feeling

BrACE Clinic services benefit patients who may need or have undergone:

- Procedures such as cardioversions and ablations (cryoablation and radiofrequency catheter ablation)
- Device implant – Pacemaker and/or left atrial appendage occlusion device
- Specialized medical management

Collaboration with the Primary Care Physician or referring Provider is key to the patient's well-being and we are happy to assist you and your patients in any way possible.

For more information please call 402-483-3346 and ask for the BrACE Clinic.
