

Heartland Health Alliance (HHA) established a Credentialing Verification Organization (CVO) in 1994. The HHA credentialing service team strives to provide timely and accurate credentialing information for our clients. Our credentialing team consists of three staff members with years of credentialing experience. We provide services to 35 clients and have approximately 3,000 providers in our database that are credential and re-credential for our clients.

We provide a thorough quality assurance audit on each file prior to its release to the client. In addition, we offer a 30 business day guarantee turnaround time on initial and reappointment files. The 30 days commences upon receipt of a completed application and supporting documents. If we fail to follow through on completing the file in 30 days, the client doesn't pay for the service (some exclusions may apply). We offer convenient, easy to use online application and peer referencing forms to streamline the process.

If you are interested in our service or have additional questions, please contact Laurie Otto at 308-697-4000 or [laurie.otto@bryanhealth.org](mailto:laurie.otto@bryanhealth.org).
