

# Your COVID-19 Vaccination Choice

Getting vaccinated is one of the most important things you can do to help protect yourself, your loved ones, and your community from COVID-19.

Vaccination can help you get back to the people and activities you miss. Everyone age 12 and older is eligible to get a COVID-19 vaccination.

"I trust the science behind the vaccines developed to fight COVID-19. It can be hard to sort fact from fiction. That's why I want

to be open, honest, and vocal about my decision to get vaccinated."

— **Vanessa Hux, MD**, obstetrician-gynecologist and assistant professor of obstetrics and gynecology (Florida)

"My plan to get the vaccine goes beyond my concern for my family. I want to be part of the solution to end this

pandemic. The more people who get vaccinated, the sooner we'll be able to start returning to our normal lives."

— **Shana Miles, MD, PhD, FACOG**, obstetrician-gynecologist; military physician; fellow in minimally invasive gynecologic surgery; and emerging infectious diseases specialist (Pennsylvania)

## **PREGNANT?**

The American College of Obstetricians and Gynecologists recommends that pregnant individuals be vaccinated against COVID-19.

## **THINKING ABOUT HAVING A BABY?**

You can get a COVID-19 vaccine. COVID-19 vaccines do not affect your fertility. You do not need to delay getting pregnant after you get a vaccine.

## **TALK WITH YOUR OBSTETRICIAN-GYNECOLOGIST ABOUT ANY QUESTIONS OR CONCERNS.**

Vaccination is a personal choice. We will listen and respond so that you can make an informed decision. This conversation is not required to get a vaccine, though it may be helpful.

## **GET YOUR FREE COVID-19 VACCINE**

There are many places near you where you can get vaccinated. Visit [vaccines.gov](https://www.vaccines.gov) or [vacunas.gov](https://www.vacunas.gov) to find them.
