Rapid COVID-19 NAAT (Final result)

	Value	Ref. Range	Verified On
Rapid Covid-19 NAAT	Negative	Negative	2/14/2022 1023
Negative results should be treated as presumptive, but do not rule out SARS-CoV-2 infection and should not be used as the sole basis for treatment or patient management decisions, including infection control decisions. Negative results should be considered in the context of a patient's recent exposures, history and presence of clinical signs and symptoms consistent with COVID-19, and confirmed with a molecular assay, if necessary for patient management.			

Resulting Lab: PLL

Order Comments:

Negative results do not rule out SARS-CoV-2 infection and should not be used as the sole basis for treatment or patient management decisions, including infection control decisions. Negative results should be considered in the context of a patient's recent exposures, history and the presence of clinical signs and symptoms consistent with COVID-19.

Swab specimen 22PL-045P0008 from Nasal Non-blood Collection. Ordered by Lab On Demand Request. Authorized by Unspecified. Collected: 2/14/2022 1021 Received: 1021. Verified: 2/14/2022 1023. Resulted by PLL.
